SHAREPOINT PORTFOLIO

Mahanagar Gas Limited

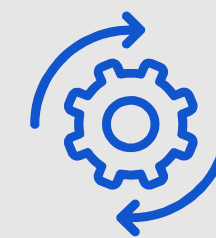

About the project:

Digitalizing LOI Internal Approval process to issue License for Opening CNG Station in a proposed location.

Requirement:

The main objective of this project is to digitalize the LOI Process Flow. It includes the processes of Marketing, E&P CNG, Legal, E&P Steel, O&M, E&P Civil, Security, Finance, and Revenue & Tax departments.

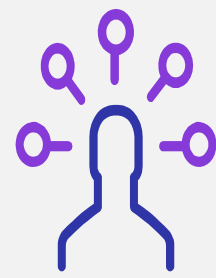

Solution provided:

SharePoint is the backend data source for this project. SharePoint site with all the lists forms has been created. Approval flows has been build using Power Automate.

Nonviolent Peaceforce

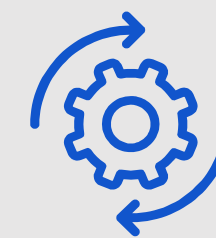

About the project:

Non-Violent Peace Force is a nonprofit organization for which Innoventix Solutions provides SharePoint Hierarchy, Portal Setup, Migration and overall Office 365 support to get the company's intranet portal organized.

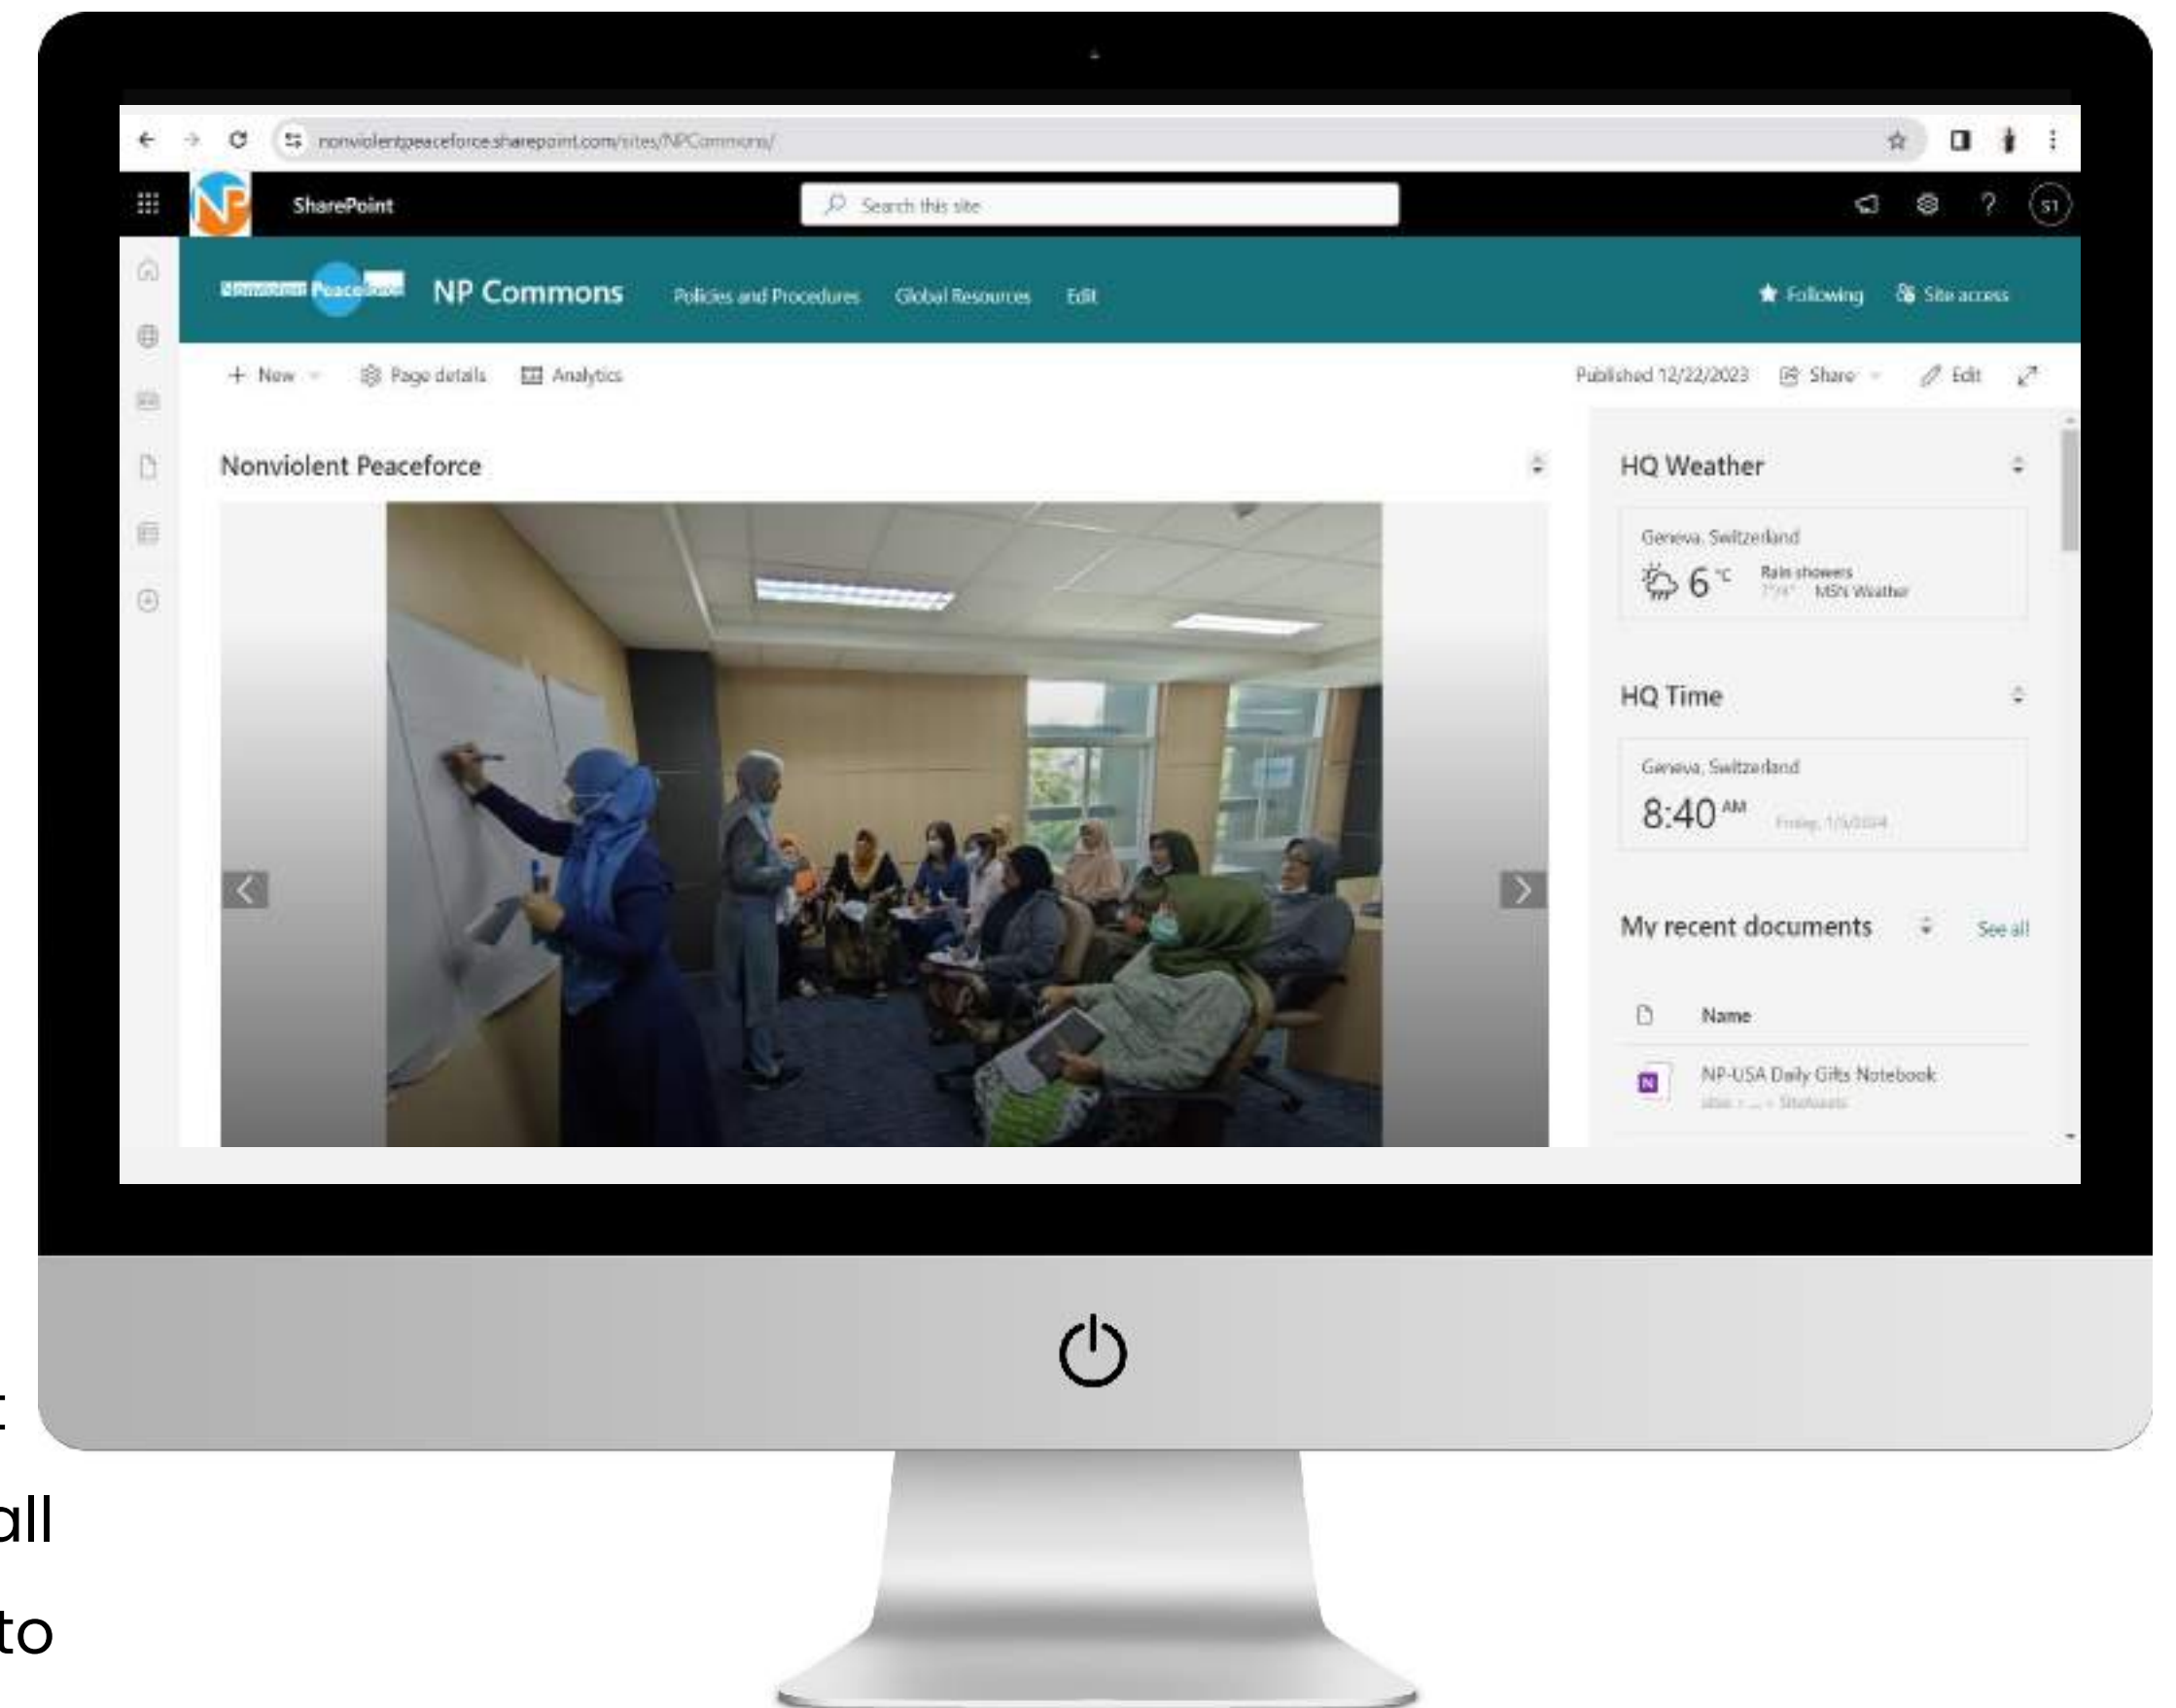

Requirement:

Non-Violent is a global NGO with more than 400 employees across the world. They needed consulting on organizing the SharePoint Portal, Document management system and SharePoint Governance.

Solution provided:

Our experts did the discovery of 7 regions of Non-Violent Peace force and built a strategy to migrate and merge all their old SharePoint sites. This not only helped the client to maintain the sites better but also helped in ease of collaboration.

WELSPUN (DMS)

About the project:

Welspun had pivoted into a new vertical called Welspun Logistics Park and was looking to use SharePoint for building the DMS and process workflows. Innoventix Solutions helped WOLP achieve this by building a custom DMS.

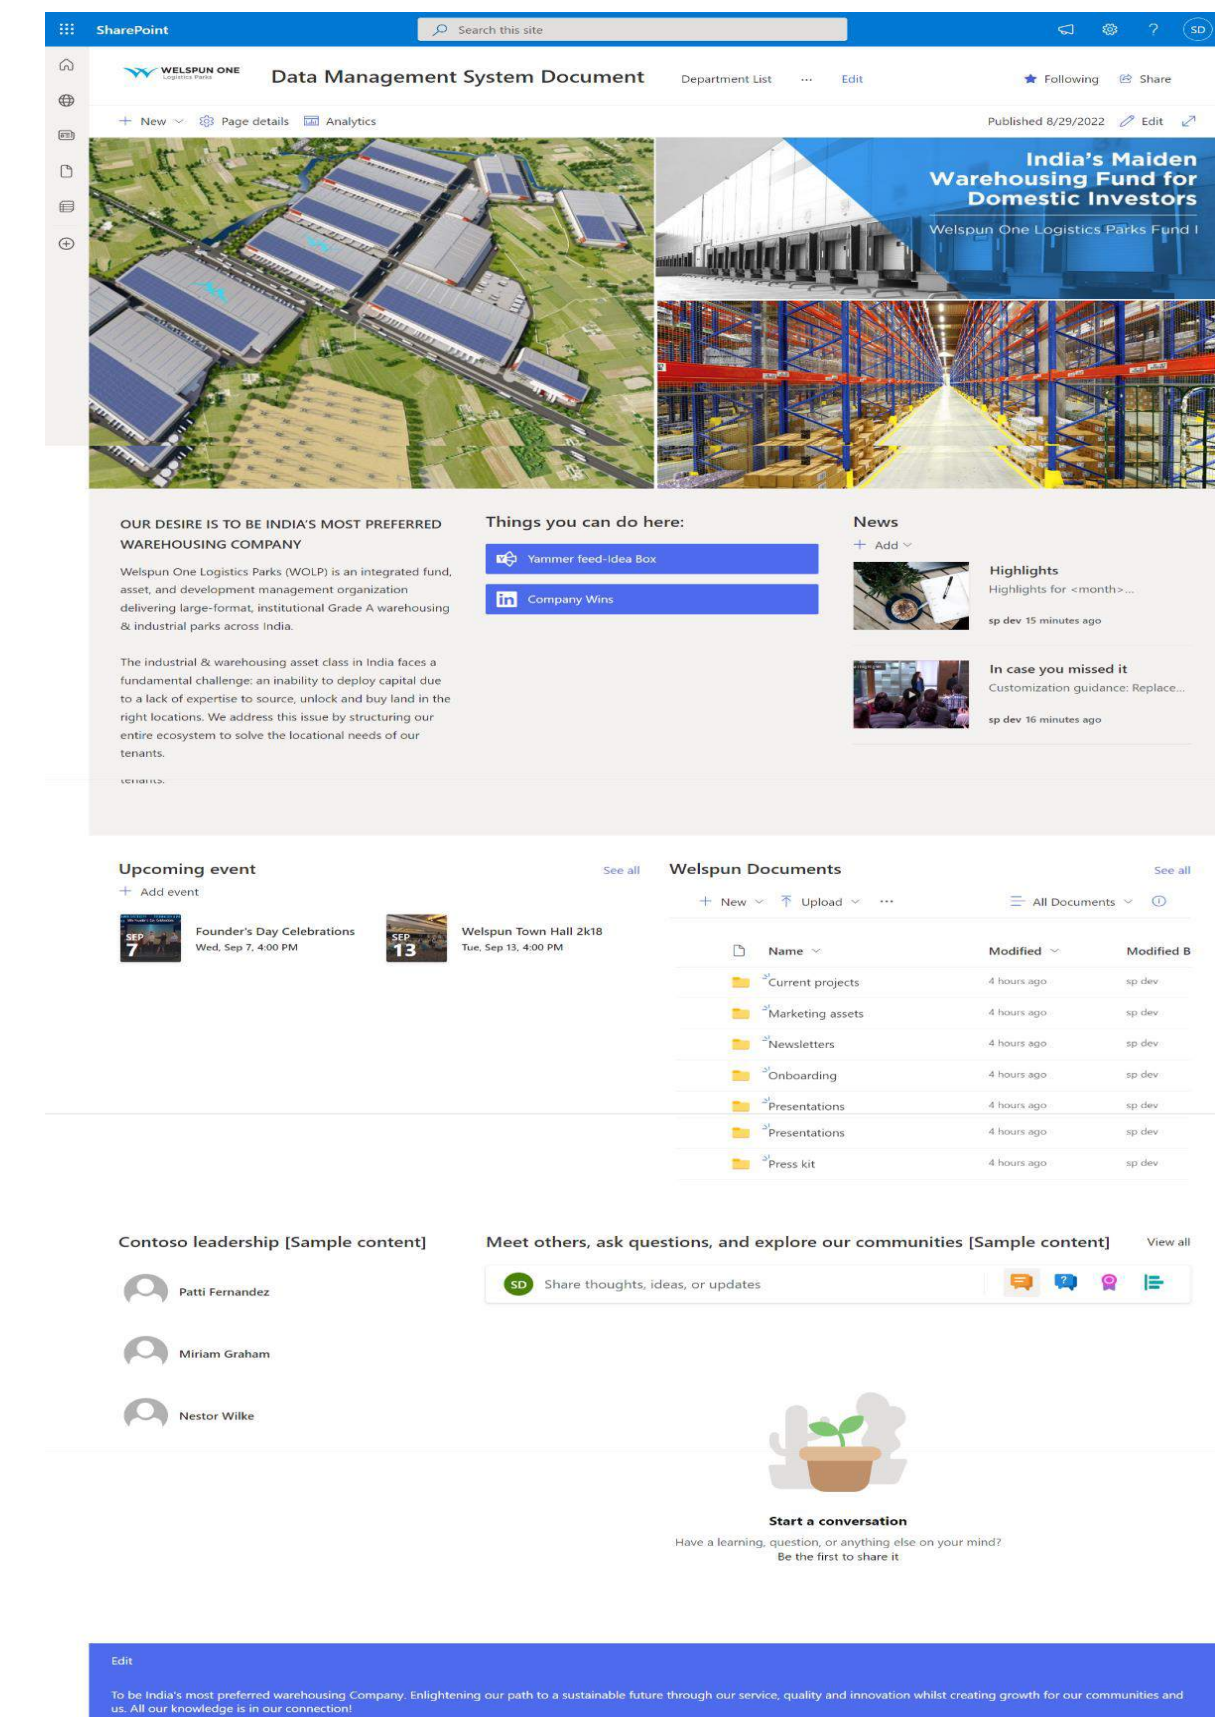

Requirement:

WOLP had a specific folder structure that was used for each of their projects, and they needed an easier way to manage project folders and run the review process on them.

Solution provided:

Innoventix Solutions helped WOLP build an easily replicable folder structure with project permission also set automatically using Power Automate. The newly built DMS helped WOLP save a lot of time in creating new projects and maintaining them.

KEENTAL ENGINEERING (SHAREPOINT PORTAL)

About the project:

Keental Engineering was an engineering firm looking to have a common Intranet Portal for their company staff. One place where all staff members can log in and get the latest updates. We helped them build an intranet portal in SharePoint.

Requirement:

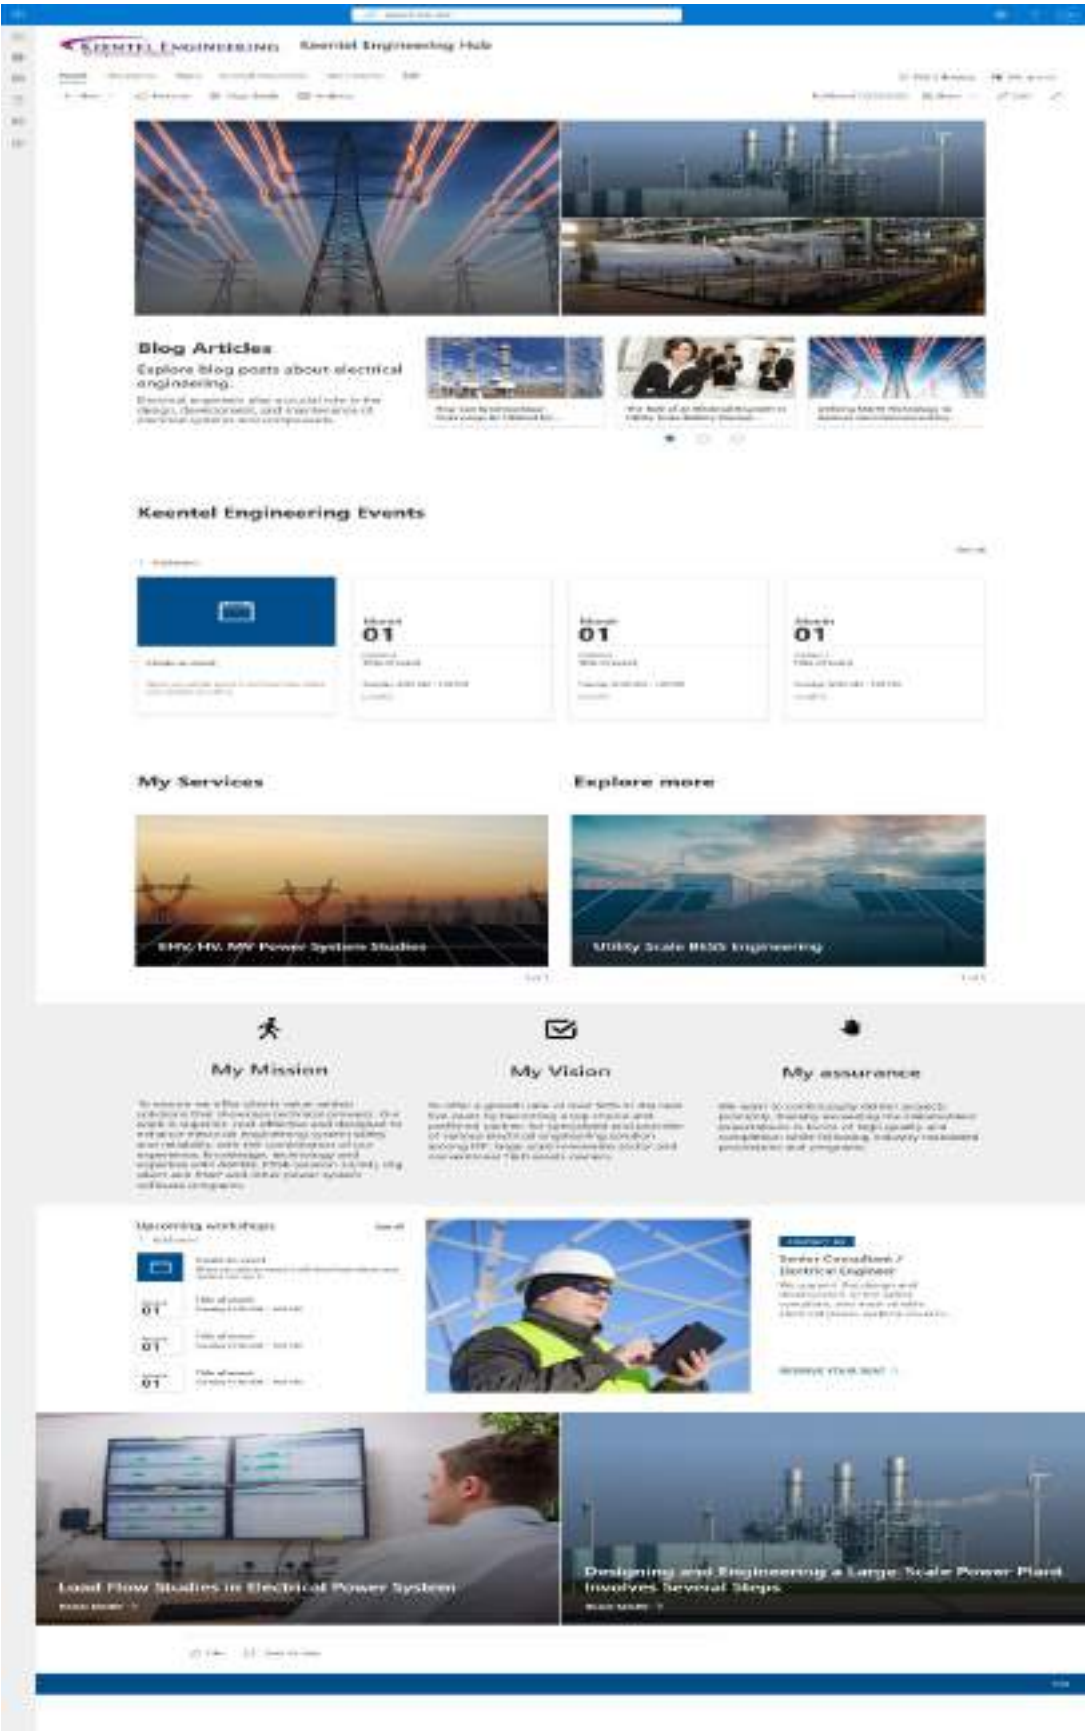

Department-wise access and permissions as data privacy were a big issue at the client intranet portal. Also, all their websites were scattered and not linked with each other.

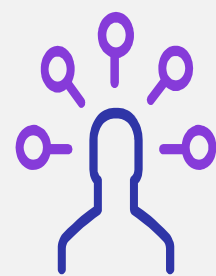

Solution provided:

We created canvas PowerApps that helps professors to create student profiles, create and manage new lessons, and create and manage appointments. We also created a student portal that allows students to view all the courses and their respective lessons and can also view the appointments that professor created for them.

SHARP INTRANET PORTAL

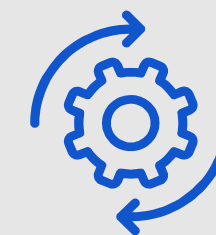

About the project:

Client, a big manufacturing firm needed experts to design master pages and page layouts for intranet portal. Since the firm had branding standards and protocols and this was our big break to connect with major firm, we scheduled multiple meetings.

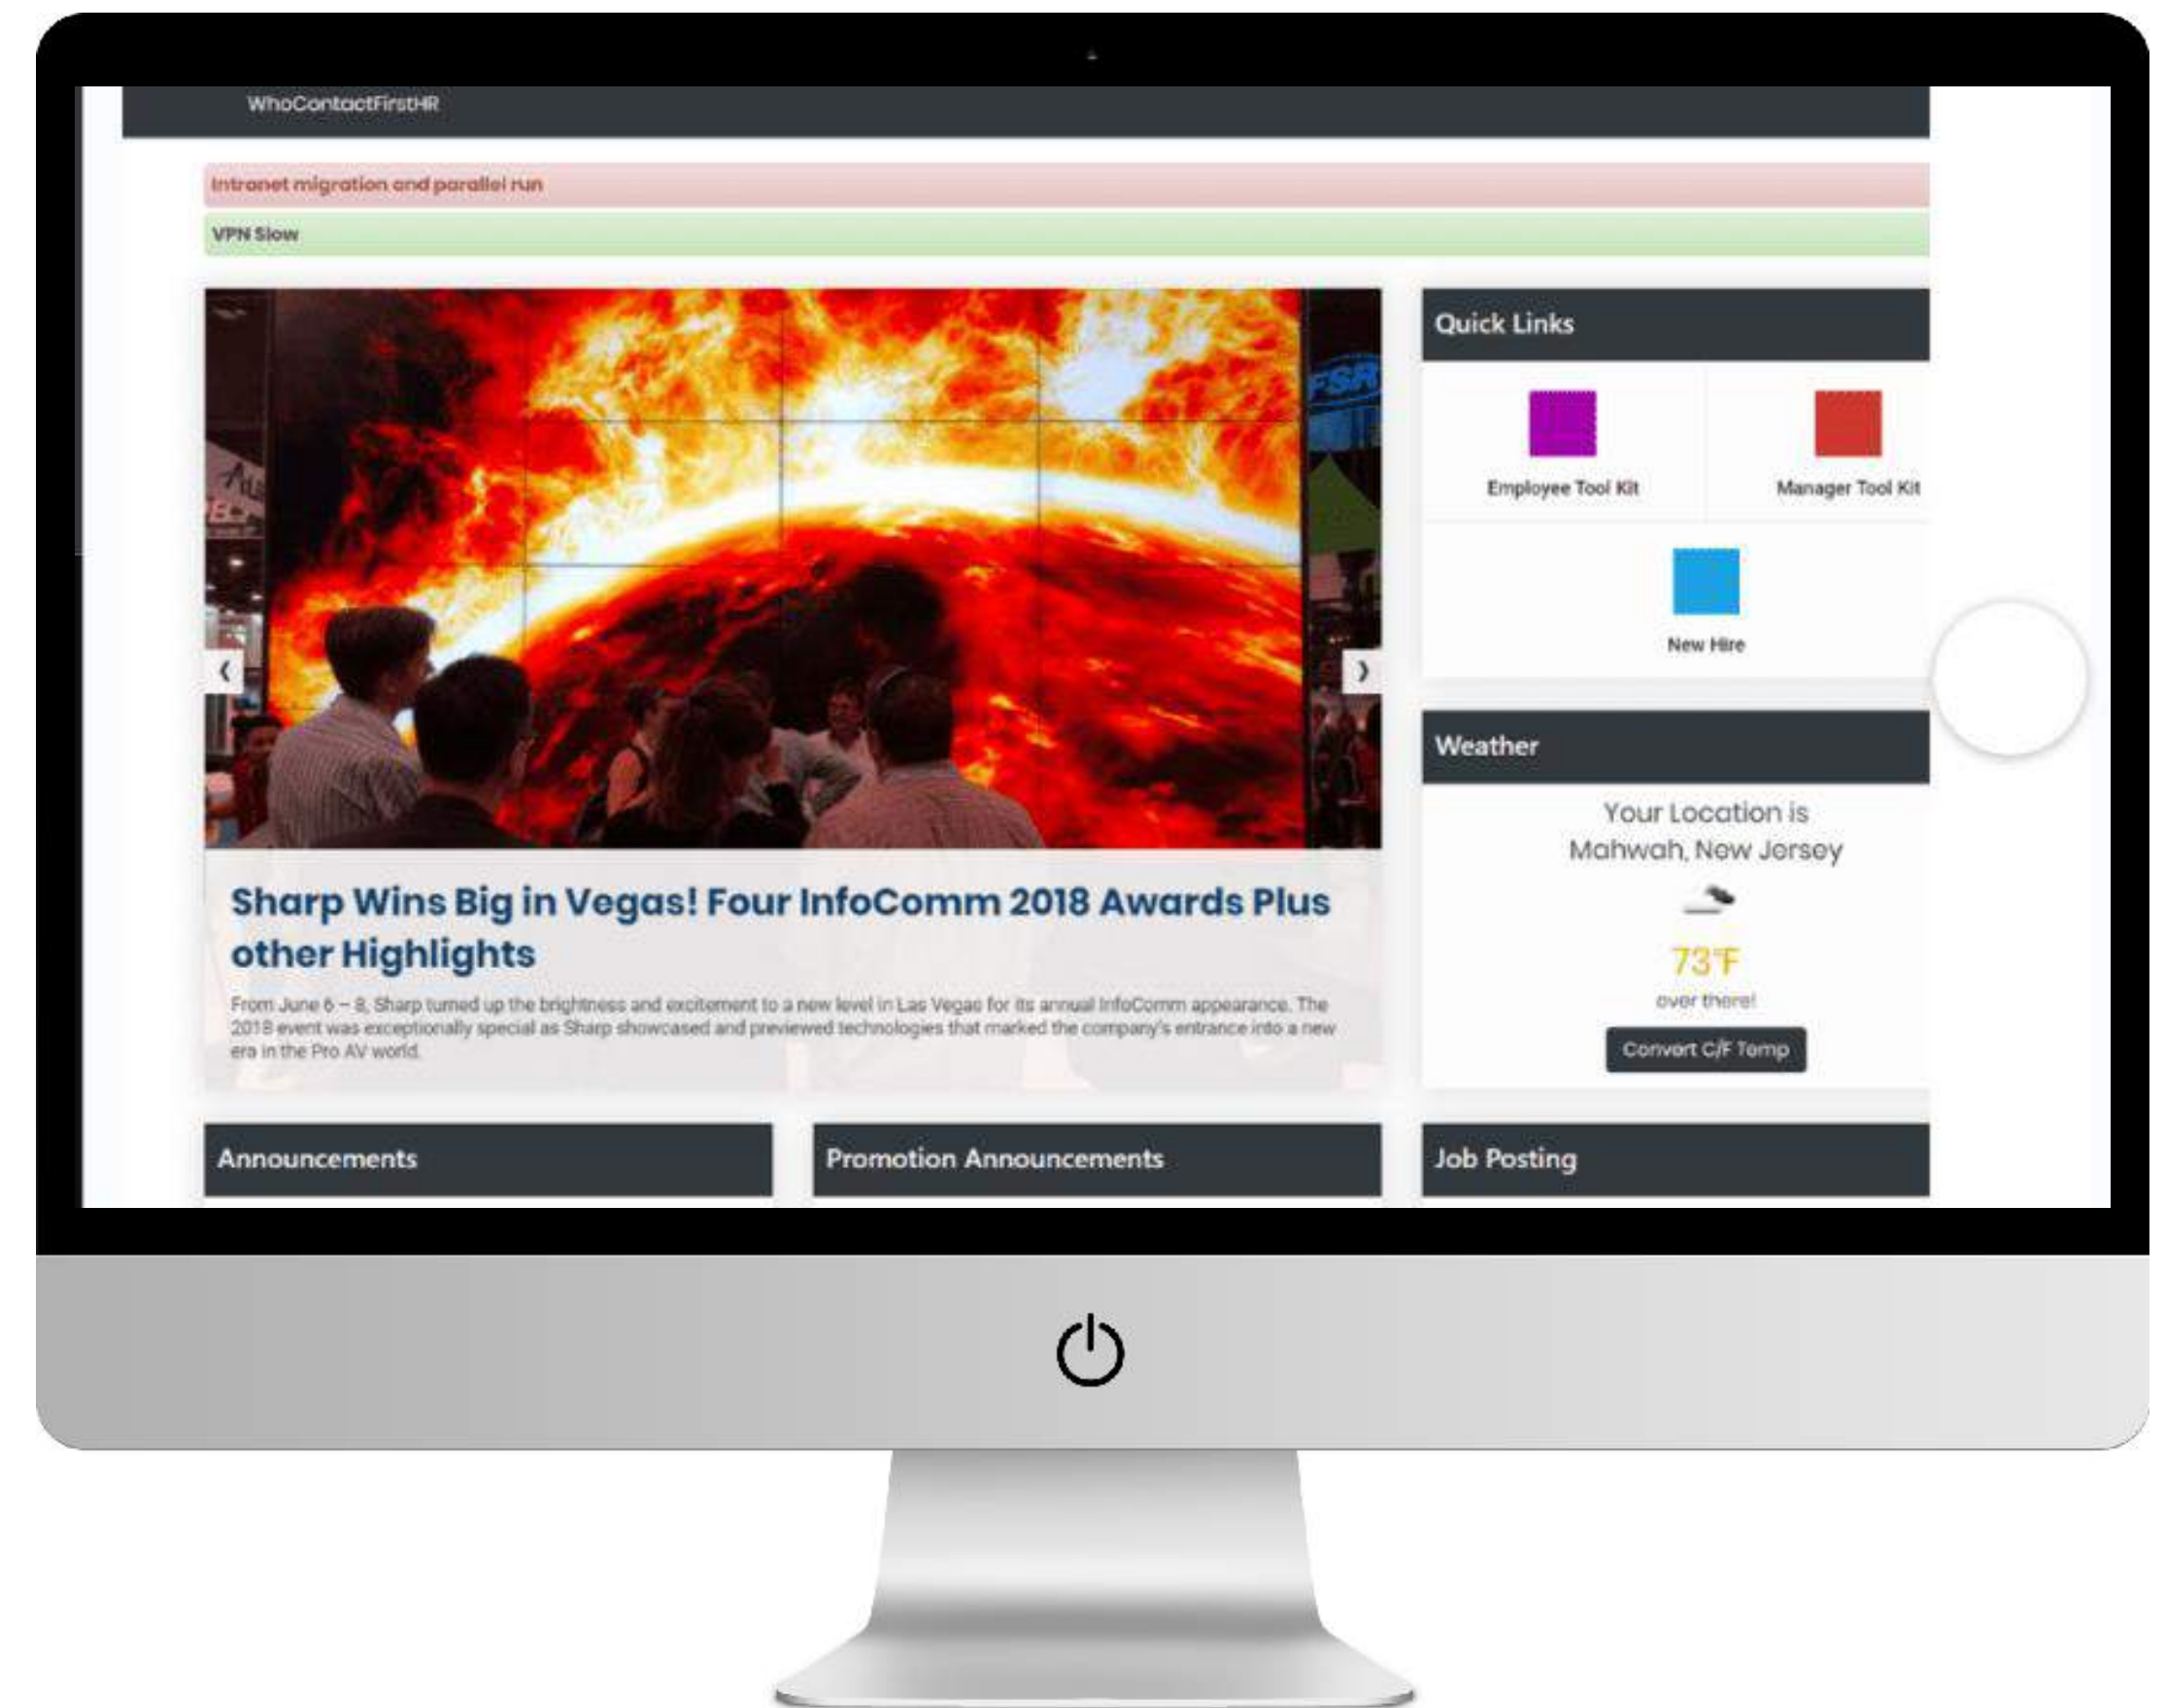

Requirement:

The client was using out-of-the-box layouts for their intranet portal and needed to revamp their look and feel to make it more modern and informative.

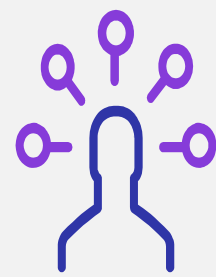

Solution provided:

We worked with their IT team to build few page layouts and master pages that suit their vision and they liked it a lot.

ASSET MANAGEMENT

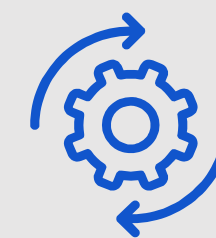

About the project:

The client is a lost asset management firm based in Australia. They help their clients find any unclaimed assets under their name. The portal they have built allows document management and performance analysis for users.

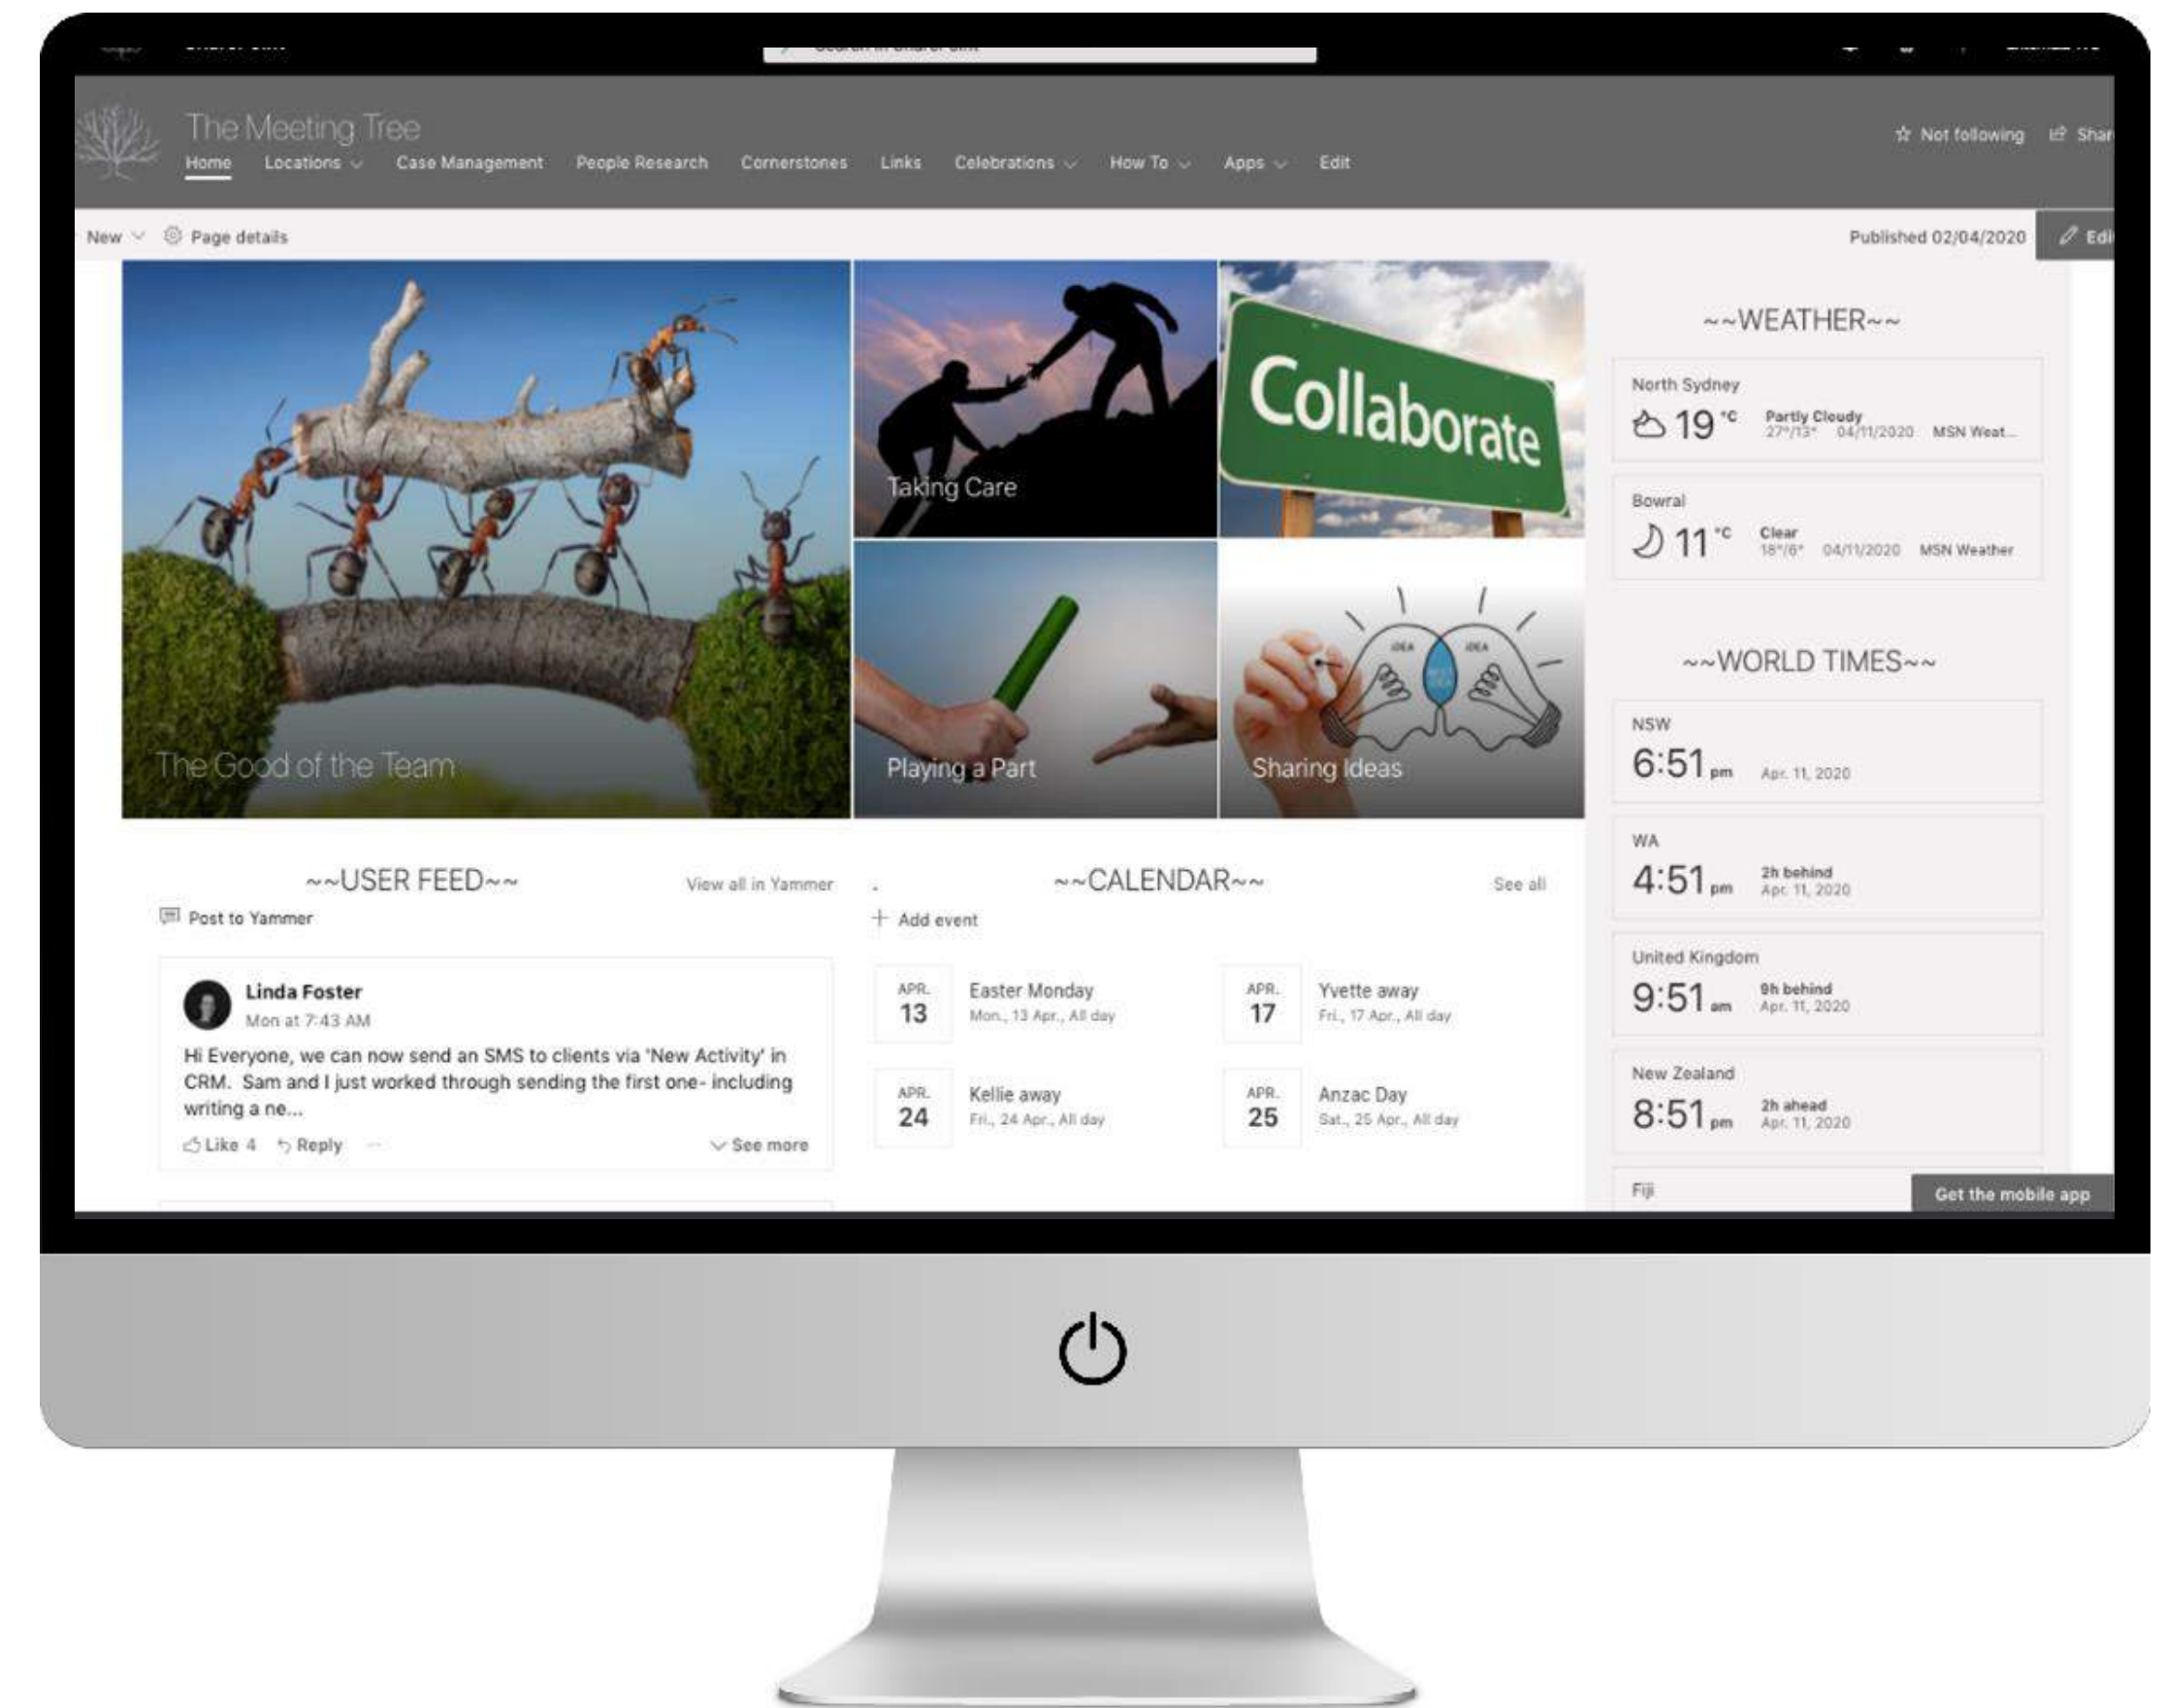

Requirement:

Their client data were stored in SharePoint site and SQL Server. There were custom pages that needed to be migrated to Azure websites and also the SharePoint Data to SharePoint online.

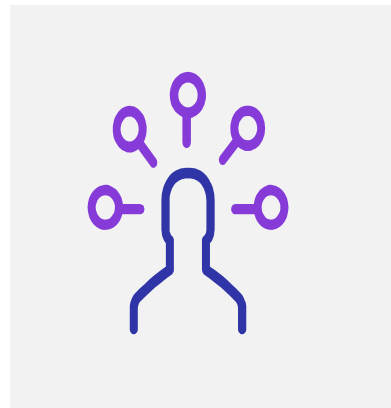

Solution provided:

We did Gap Analysis for the features that could be migrated and features that needed custom development. Prepared a plan to do site-by-site migration of data from SharePoint 2013 on-premise to SharePoint Online.

US BASED INSURANCE GROUP

About the project:

Client wanted to migrate their entire on-premise SharePoint, Project Server and Performance Point server structure from the 2016 version to 2019.

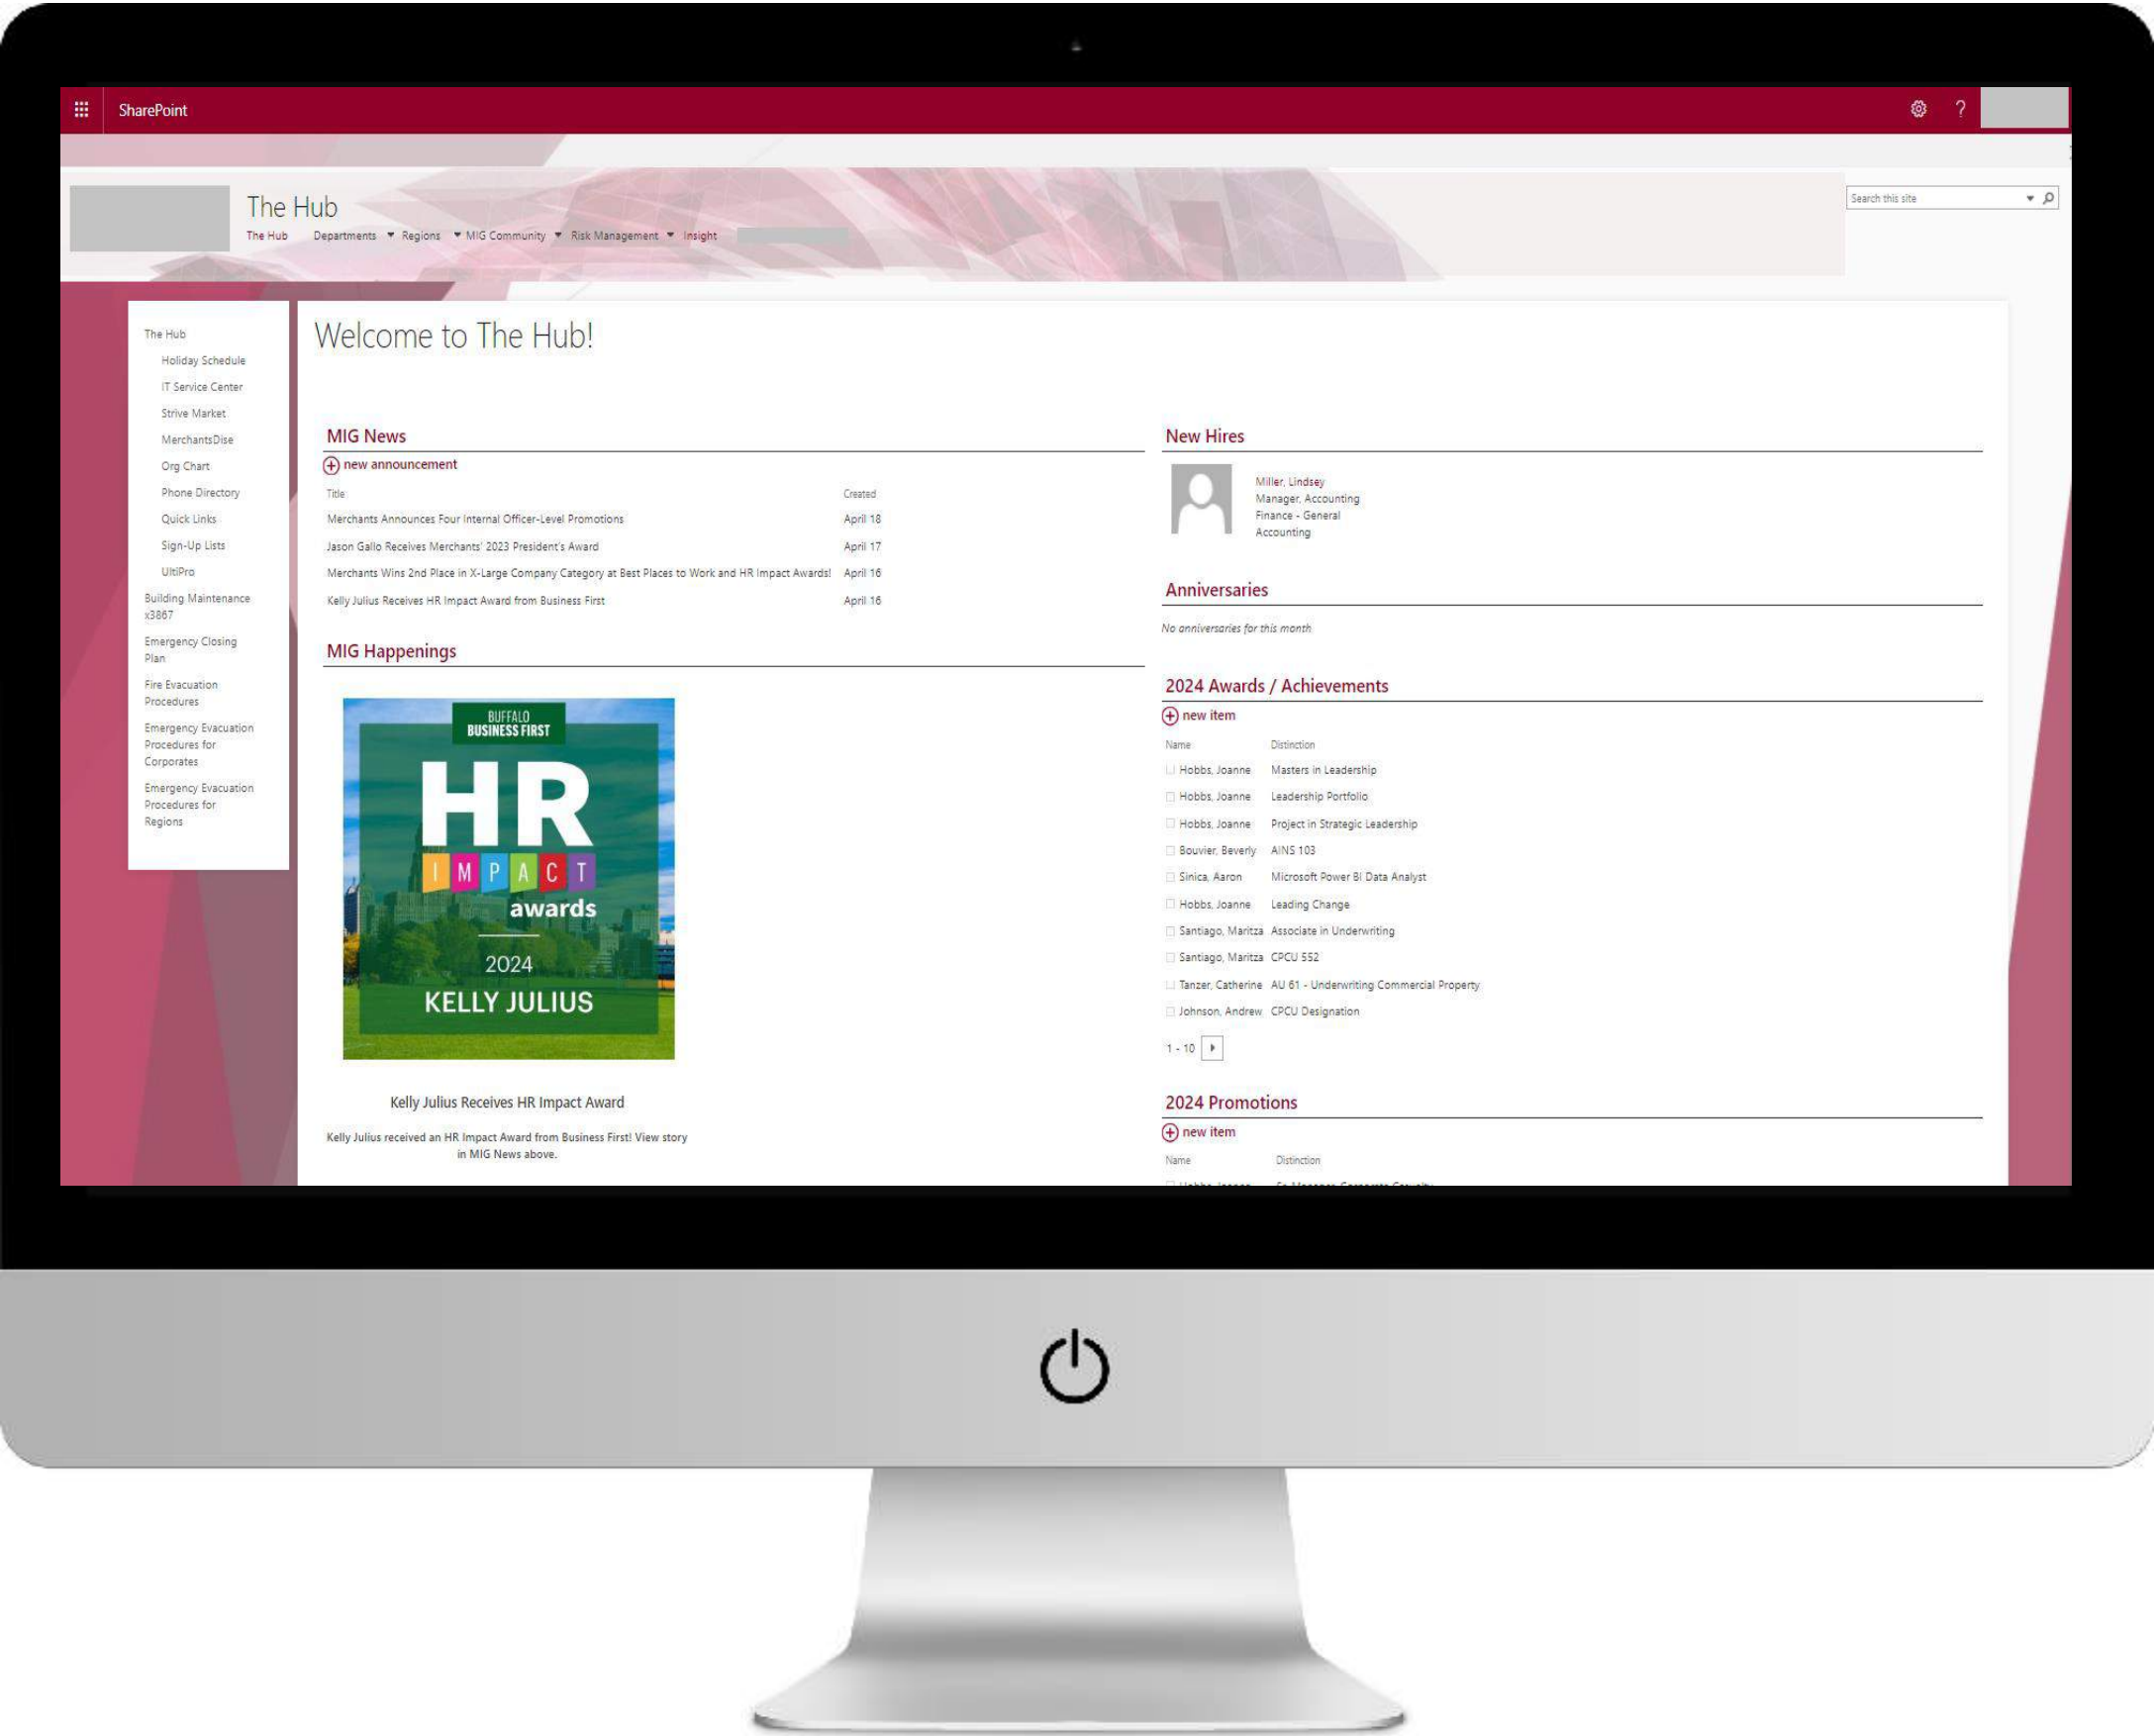

Requirement:

The Insurance company was using 2016 version of SharePoint, Project server and PerformancePoint servers for document management, internal process reviews and case management. They needed to use the latest features by upgrading to SharePoint 2019.

Solution provided:

Innoventix solutions analyzed their current server architecture and layed out a plan to do phased migration from sharepoint 2016 to 2019 within a span of 1 year.

WSTF PROJECT TRACKING

About the project:

The Water Fund Integrated Information System is a software that allows for the tracking of projects, programs and institutional goals for the Water Sector Trust Fund.

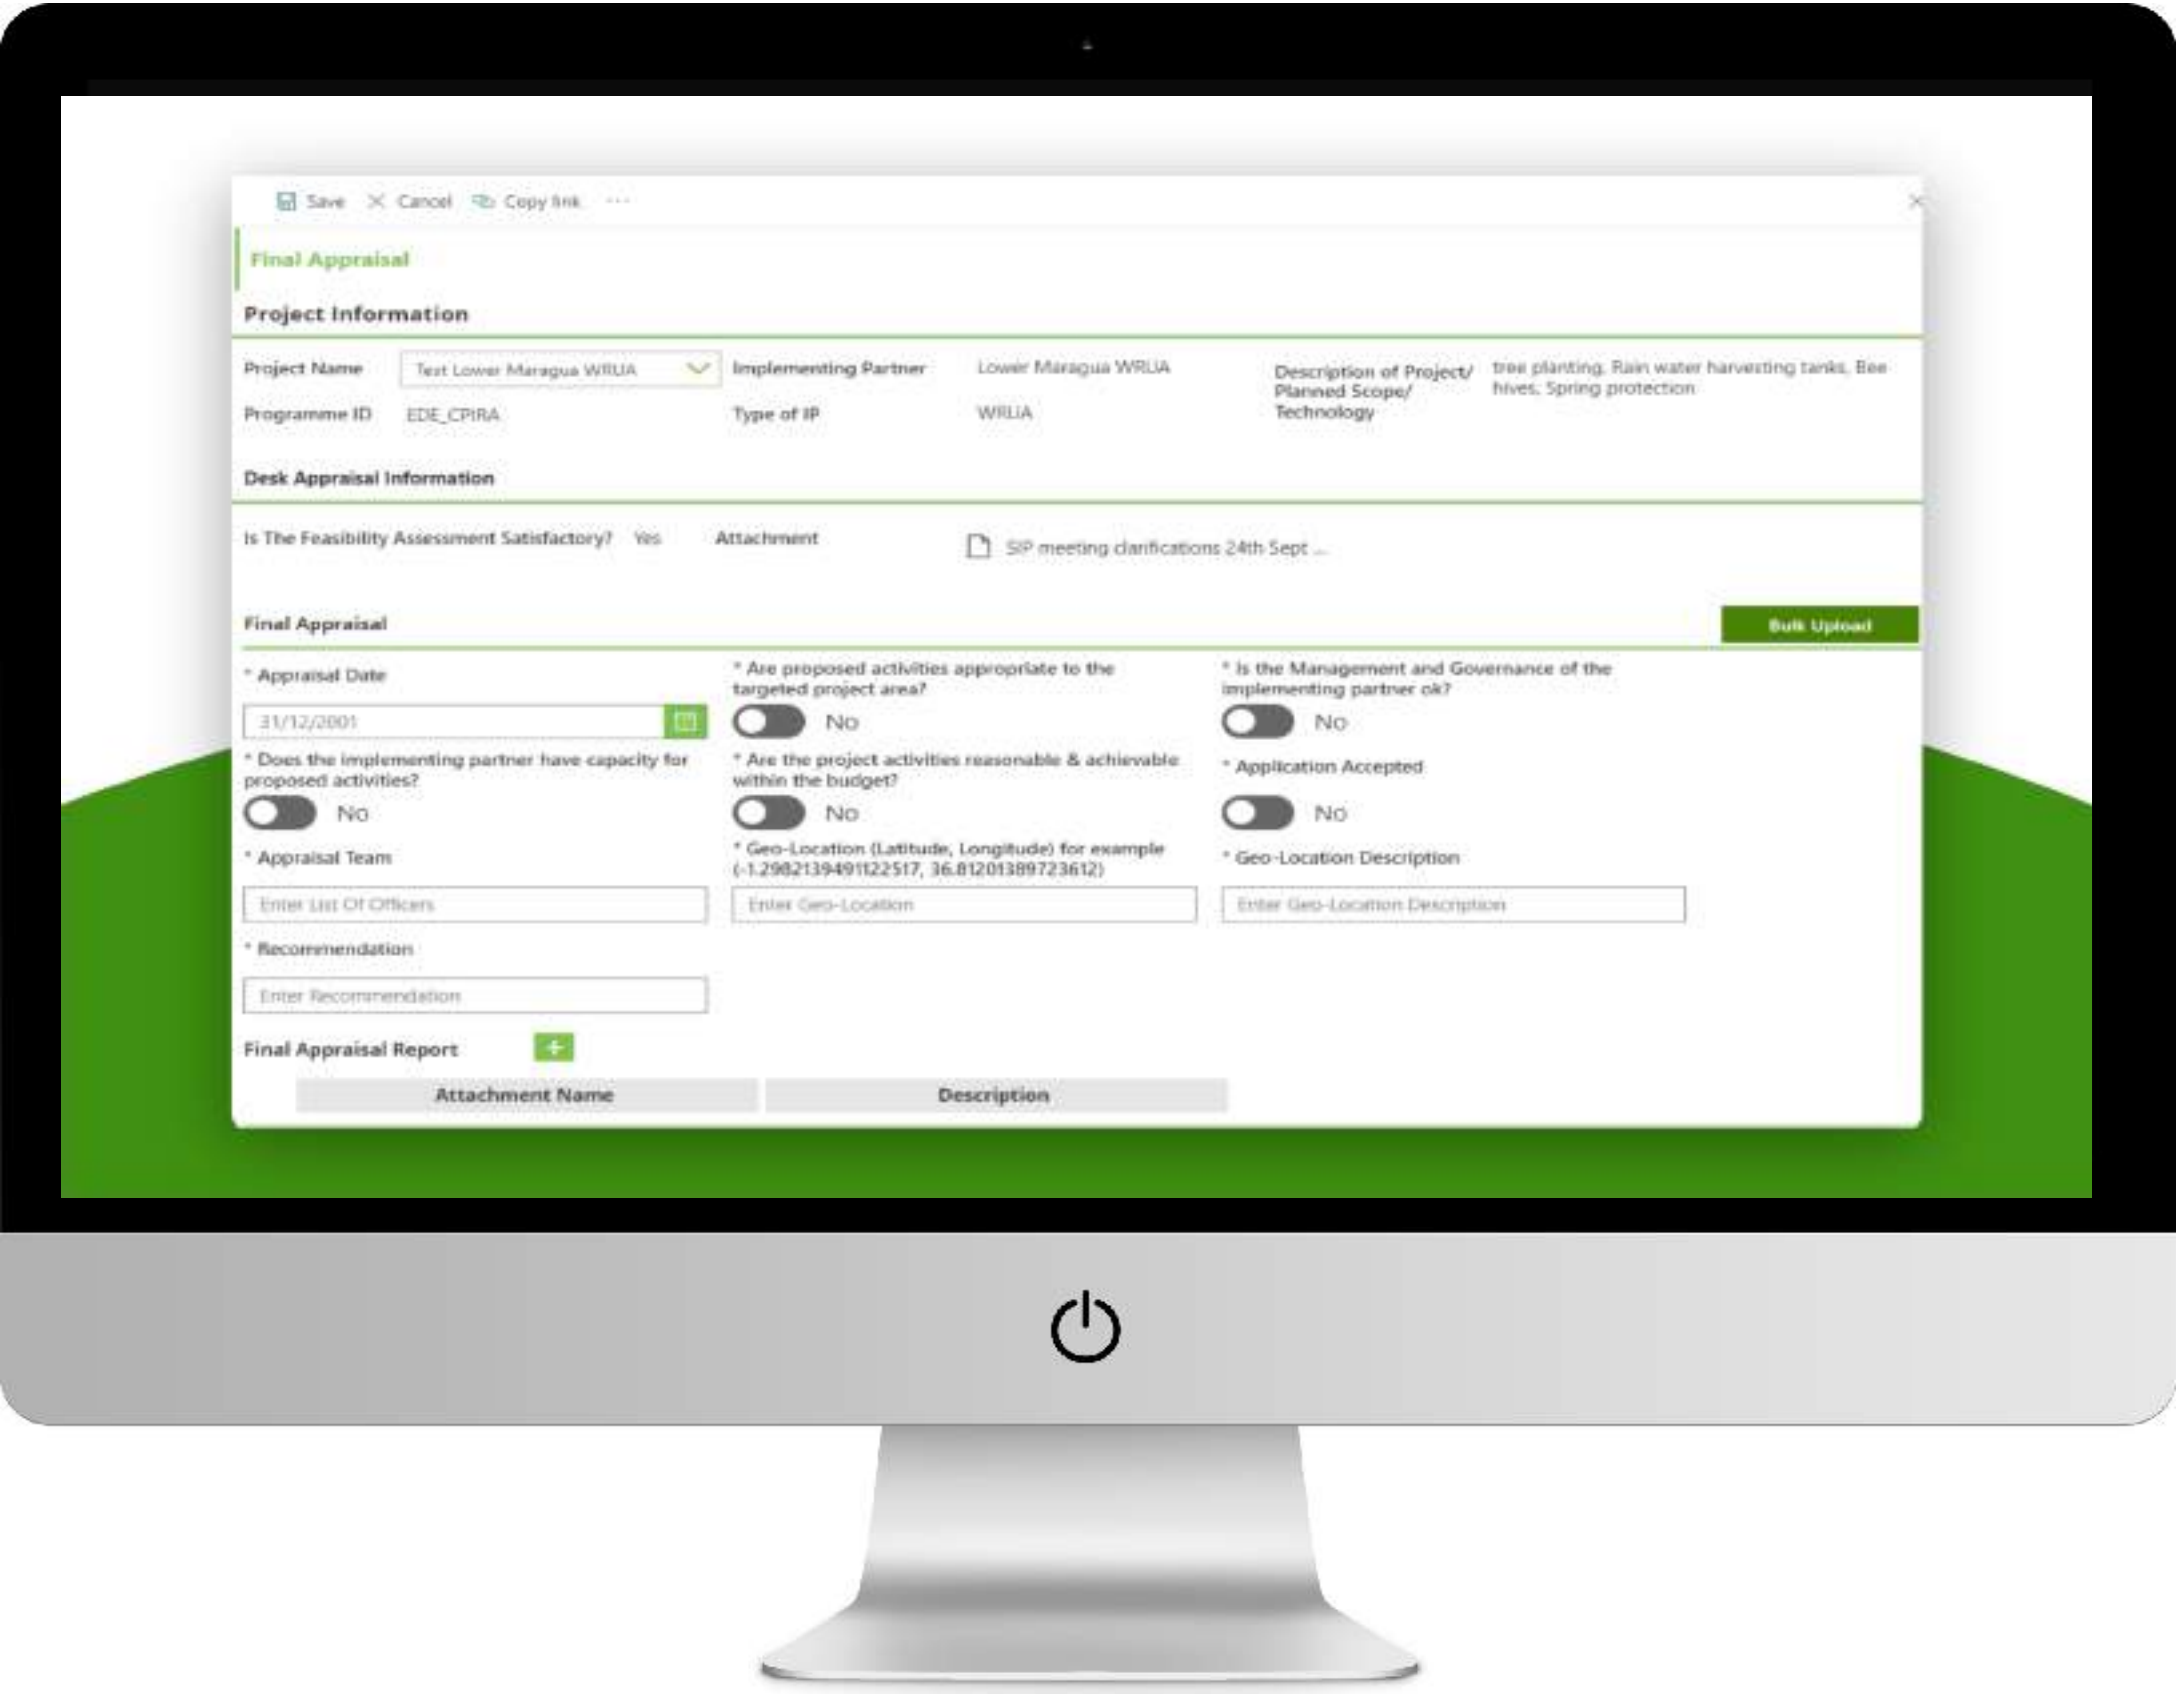

Requirement:

The client is a sub-contractor for the government of Kenya and was looking for Office Automation with apps for routine office tasks and also a Major app for Project management, appraisal, signoff, etc.

Solution provided:

Innoventix Solutions understood the entire process for all office tasks and project management steps and suggested a hybrid solution using PowerApps/SharePoint/Power Automate which allowed them to track projects and tasks easily.
