
Developer 1 Sr. DotNet Fullstack Developer

Overview

- I am Fullstack Developer with 9+ years' experience specializing in .Net, SQL Server, ETL, continuous improvement, and database management. Adept at coordinating with diverse technical teams to architect database solutions and enhance system performance.
- I can work with huge database system management and data modeling as per the project requirement.
- Excellent working skills in MS SQL Server business intelligence tools SSIS, SSRS, and SSAS.
- Well-versed in ASP.NET MVC and building a back-end web application.

Tools& Technologies

- Trello, Bitbucket, GitHub and Jira.
- C#, JavaScript, jQuery, XML, Linq, Ajax, SQL Server 2016, ASP.Net Core MVC C#, JSON, WebAPI.

Skills

- Creating databases skeleton for large and complex systems considering robustness and scalability.
- Legacy Database maintenance.
- SQL server schema development like View, stored procedure, function, trigger.
- Knowledge of database design like normalization.
- Experience with Performance Tuning and Optimization (PTO).
- Effectively managing backups and restores of DB.
- Carrying out ETL operations (Extract, Transform, and Load) with SQL Server Integration Services (SSIS).
- Attend meetings with database and application development teams to identify solutions to recurring issues and expand the knowledge base for bug fixes.
- Coded PL/SQL Packages, procedures & Triggers to perform data loading, Error Handling and logging.
- Worked with team members to tune the SQL queries using

SQL Profiler.

- ASP.NET, .Net Core, ASP.NET MVC 3-5, C#, Visual Basic, F#, and C++
- JIRA, Firebase, Docker Cloud, Browser Stack, AWS, Redash
- Docker Scripting
- Agile Workflow
- Dependability
- Effective Communication & Time Management

Project Experiences

Insurtech Platform (ASP.Net Core MVC C#, Json, jQuery, JavaScript, SQL Server 2019)

Provide vehicle and Health Insurance in the middle-east, we made this service available for customer convenience in the easiest way possible. When you buy insurance from us, you get more than just financial safety. You also get our promise of simplifying complex insurance terms and conditions, quick stress-free claims, instant quotes from top insurers, and being present for you in the toughest of times.

Job Role: Lead Data Architecture, Backend Developer

Cricwars (ASP.Net, C#, MVC5.0, jQuery, Json, JavaScript, WebAPI, SQL Server 2019)

Here at Cricwars we have three different types of games Cricket, Football, and Kabaddi, where you can play Fantasy, Weekly, and Auction and win real money. Which is what sets us apart from everyone else. You will be provided with a unique gaming structure that you can use on any platform.

Job Role: Lead Data Architecture, .net Lead Developer

Bayside Sports (.NET MVC C#, Web API, Json, Ajax, SQL Server 2019)

This application is used for cricket scores, match schedules, latest sports news, and stats, also users can book nets, tournaments, matches, and tours through this application.

Job Role: Lead Data Architecture, Backend Developer

BookAsOne (.NET MVC C#, Web API JSON, jQuery, Ajax, SQL Server 2016)

This system is used for booking online packages and Excursions, and also, we include social parts on this system. Where users can create Pages, create Groups, create blogs, create Albums, create a bucket list, add a wish list, add calendar details, and write the message to /her friends. This system combined both online packages, excursion books, and social media.

Job Role: Lead Data Architecture, Backend Developer

Investment Portal (Asp.Net, C#, Angular, Ajax jQuery, XML, Linq, Ajax, SQL Server 2016)

It was internal investment portal where all property investors can invest with their own percentage and shared monthly distributions. It was all manual process with excel file but now we built a robust system for client and they are using it dynamically.

Job Role: Lead Data Architecture, .net Lead Developer

Education

Saurashtra University / Msc. IT & CA

May 2013, Gujarat
